PRODUCT RELEASE NOTES

AI Purchase Order Categorization

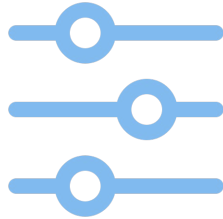

June 2024

What's New?

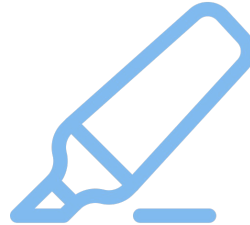

In this release, we introduced AI to categorize purchase order line items by product/service codes in order to help you refine your results more efficiently.

AI Purchase Order Categorization:

Overview

Let us help you search more efficiently!

With over 1.4B PO line items in GovSpend, identifying actionable data can often feel like finding a needle in a haystack. We're here to help!

We've introduced AI to categorize and standardize purchase orders using the industry-standard UNSPSC Code system (product/service categorization system). Scrap the complex keyword combinations and get more relevant results with a simple filter!

- Filter your search results by product/service categories like Software or Office Supplies to get more actionable results using fewer keywords.
- Easily search and identify relevant categories within the UNSPSC code system via a searchable hierarchy filter
- View the full hierarchy classification for each line item in your search results and export with the click of a button.

Product Classification (UNSPSC)

AI Purchase Order Categorization: Filtering

We've added a new type of filter in Spending to allow you to filter using UNSPSC Product/Service codes. Easily understand the hierarchy of codes and find those most relevant to improve your search results.

HOW TO FIND IT

- Navigate to the [Spending Module](#)
- Find the “**Product Classification (UNSPSC)**” filter at the bottom of your left set of filters
- Click “Launch Industry Picker” to open up the hierarchy of product/service codes for selection
- Use the top search bar in the modal to search for codes related to the product/service you want to search
 - ◆ Codes that match your search term will be in bold
- Hover over codes in the hierarchy display to view the code and definition in the left panel of the modal
- Use the check boxes on the left to select codes you want to use for filtering. As you select they will appear as tags at the top of the modal.
- Once you've made your selections, select “**Apply X codes**”
- Click “**Search**” on the main search page to filter your search results

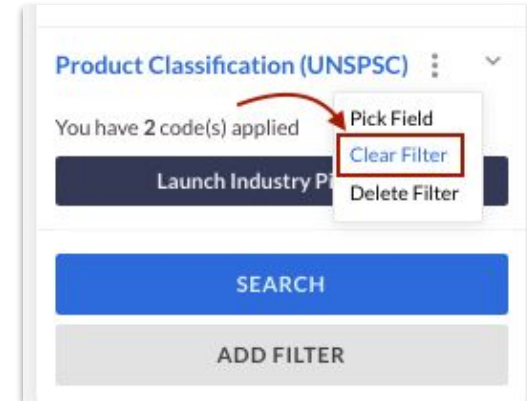

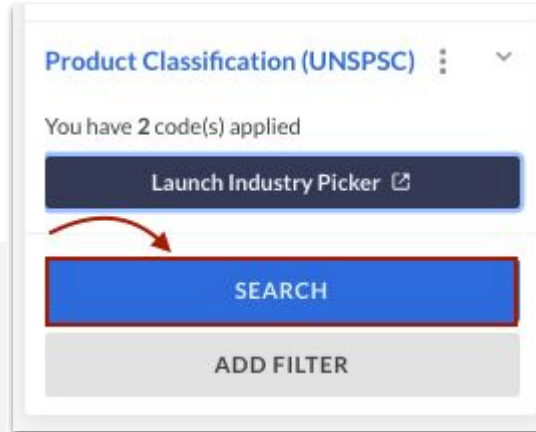

AI Purchase Order Categorization:

Search & View Results

Filter your search based on your selected product/service codes and view the code and code label in the search results table.

HOW TO FIND IT

- Navigate to the [Spending Module](#)
- Make selections within the Product Classification filter as described in the previous slide and “apply”
- Click the **“Search”** button on the main search page to filter your results by the codes you’ve selected
- View all levels of UNSPSC code assigned to each line item, ordered from top level to most granular, via the **“Product Classification (UNSPSC)”** column
- Adjust other filters to further refine your search
- Click “Save Search” to save your search
- To clear the selected Product classification codes, click the 3 dot menu next to the filter name and **“clear filter”**
- Click “search” to apply those changes
